

World-Class Application Development and IT Services

What do Ebay, The Wynn Hotel, and telecom giant Windstream have in common? SaaSafraS, you say? BINGO!

The answer is that each of these American companies has chosen SaaSafraS as their strategic IT Services Partner. And they are not alone. With a global reach and development team in the US and Beijing, China, the SaaSafraS customer list continues to grow and reads like a who's-who of Fortune 1000 companies. Our teams of consultants/developers offer an array of IT Services targeted, but not limited to, the areas of Enterprise Application Integration, Business Process Management, and Workflow Projects

Our offerings include:

- **Business Process Analysis**
- **High Level Product Design and Development**
- **Architecture Assessment and Design**
- **User Interface/Device Drivers Consultation**
- **Migration to new technologies as .NET or Java**
- **Platform Porting**
- **Existing Feature Enhancements**
- **Cross Platform Validation and Certification**
- **Existing Code Base Support and Ongoing Maintenance**
- **Rollout and Implementation**
- **Comprehensive Test Plan Design**
- **Performance and Scalability Assessment**
- **Rigorous Bullet Proofing/Anti Hacking of Deployed Applications**
- **End User Training**

The SaaSafraS mission is to educate, consult, and help execute delivery of powerful, scalable IT solutions that streamline business efficiencies and maximize corporate profits
